

## Projekty Pilotażowe

### **PP 9 – University “Babes-Bolyai” Cluj-Napoca**

The team of “Babeş-Bolyai” University promoted curriculum of Faculty of Geography and Faculty of Environmental Science at the conference “Landscape dynamics in spatial development” in Krakow – March 2007.

The team members realized a digital data base related on the identification of specific CL elements in Transylvania (fences, walls, haycocks, forestry curtains, draw wells, isolated trees, traditional houses, lacustrine landscape and fishponds etc.)

They attended all project meetings, including papers, discussions and lectures that took place in Krakow, Kahla, St. Poelten, Krakow again, Lafnitztal).

The BBU organized the CADSES meeting in Cluj-Napoca – May 2007 – together with Ethnographic Museum of Transylvania. The important problems debated within the conference represented the theme of a students’ field trip subsequently organized in common by BBU and Erfurt University. The final results of the field trip were the base for further scientific works and papers of the team and students.

The team assisted Ethnographic Museum of Transylvania to the pilot project realization and worked together for develop of the Transylvanian network, where County Council takes part.

Programul Național Phare 2004 INTERREG IIIB CADSES
